

John Doe
Python Developer

Summary:

Experienced Python developer with strong backend engineering skills. Proven track record building REST APIs, data processing pipelines, and automation tools using Python. Comfortable in cloud environments and collaborating across teams to deliver production-ready services.

Experience:

- Developed backend services in Python and Flask, improving API response times and reliability.
- Built ETL pipelines for data ingestion and transformation using Python, pandas, and SQL.
- Implemented automated testing, CI pipelines, and deployment scripts.
- Integrated REST APIs and worked closely with frontend teams to design clear contracts.

Education:

B.S. in Computer Science (or equivalent practical experience)

Skills:

Python, Flask, FastAPI, SQL, PostgreSQL, Docker, Git, REST APIs, pandas, pytest, CI/CD
